

Elastic Wax Center

Why us?

We created Elastic Wax Center because we love making people feel beautiful in their own skin. Have your waxing done by one of our expert estheticians and you'll radiate beauty and confidence.

Providing exceptional service at affordable prices is only part of the reason our clients love Elastic Wax Center. All of our rooms are sanitized and disinfected in front of you because we understand how important this is not only for your safety but our own as well.

Our materials are sterilized and disposable with each and every tool being sterilized before use. We never double dip our spatulas to ensure further cleanliness and a great experience overall for you, the client.

All of the products we use are natural and organic from our Elastic wax to the Puritan's Pride 100% concentrated tea tree oil to keep your skin smooth after your waxing is complete. Our licensed estheticians are always here to answer any of your questions and provide you with an exceptional experience every time.

Quality Wax

Our unique aloe based hard wax aids in the prevention of ingrown hairs while leaving your skin feeling soft and moisturized. The wax works to remove all of your unwanted hair without pulling on the skin like many soft wax brands, which means a less painful waxing process.

The hard wax blend is suitable for all skin types and isn't as hot as other products making it perfect for use in even the most sensitive areas. Our unique blend works for fine and coarse hair, is hypoallergenic, and is proven to reduce the reappearance of hair in the treated area after continuous use.
